It is understood that all first class hotels have already been fully booked for some weeks prior to and some weeks subsequent to the date of the Coronation.

It is expected that before long, all possible accommodation in hotels, guest houses and private houses in and around London to a distance of 50 miles will all be taken up by intending visitors to London on this occasion. Though the Indian Services Club has been reserved for officials proceeding to London from India, it is considered that this will barely meet a fraction of the number of such officials actually visiting London. In addition to this, there will be a heavy rush of non-official visitors.

In order to avoid disappointment or serious difficulties to all official and non-official visitors to London, the Government of India suggest that they should take particular care with their travel agents to get a positive assurance about the accommodation reserved before venturing on the trip to London.

It will also be necessary to make specific arrangements for the return journey either by sea or by air as the consequences of being held up in the United Kingdom for want of shipping accommodation will be very serious unless the party is sufficiently strong financially and otherwise to prolong the visit.

Intending visitors to London from Mysore State, either for attending the Coronation or for any other purpose, are requested to take the foregoing factors into consideration before making their plans.

HEALTH OF LIVESTOCK IN MYSORE STATE DURING OCTOBER, 1952.

In their order of severity, outbreaks of Rinderpest, Blackquarter, Haemorrhagic-septicæmia, Anthrax, Ranthet, Gastro-entritis, Sheep-pox, Contagious-goat pleuropneumonia and Foot and Mouth were encountered in the State during October 1952. Altogether 157 villages were reported to have been affected by one or the other of the several contagious and infectious diseases as against 167 villages during the previous month. The number of outbreaks was highest in Mandya, Bangalore and Shimoga districts, while Chitaldrug, Chikmagalur and Hassan districts were least affected. These diseases accounted for 556 attacks, of which 427 succumbed. The departmental staff conducted 6,058 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease. In the absence of a reliable method of vaccinator intervention other prophylactic measures were adopted against Foot and Mouth disease.

Three outbreaks of Rinderpest were registered in Bagepalli taluk accounting for 11 attacks among cattle, of which six succumbed. Prompt measures of control were undertaken by the department to check its spread and 504 cattle were protected against this disease. The disease appears to be well under control at the end of the month under report.

Diseases caused by internal parasites were reported from 109 villages accounting for 28 deaths as against 118 villages accounting for 41 deaths during the previous month. The special staff attached to the parasitic disease control units of the department dosed 8,503 animals as against 7,487 animals during the previous month.

Due to widespread rains all over the State during the month, scarcity of drinking water to the livestock was removed. Fodder continued to be supplied to all the depots opened in the affected areas from Mandya district. A large number of cattle were grazing in the several forests of Mysore, Chikmagalur and Shimoga districts. At the

close of the month, the fodder position improved and there is less need for anxiety.
